Deliverable summary text:

Produce a TV documentary for TV dissemination and eventual publication on YouTube

Submitted	23/05/2018
Reviewed	23/05/2018
Final submission	23/05/2018

This project has received from the European Union's Horizon 2020 Research and Innovation program. Project "Furthering the knowledge Base for Reducing the Environmental Footprint of Shale Gas Development" FRACRISK, Grant Agreement 636811

Introduction

A documentary was filmed over the course of the FracRisk project and the result is a 20-minute television documentary on the FracRisk project.

Accessing the film

The film has been made publically available on YouTube and on the FracRisk project website:

The FracRisk TV documentary is now live on YouTube at the following web address:

<https://youtu.be/37KJ08YNKyY>

The FracRisk documentary can also be viewed on the FracRisk project website at:

<http://www.fracrisk.eu/communication/fracrisk-documentary-film>

Showings

The film was first shown publically at the EU H2020 workshop to interested EU stakeholders at Scotland House, Brussels on the 16th May 2018. It is planned that the FracRisk consortium members will show the film at their institutions and part of their teaching material for further dissemination.
